GROUP 3600

IN THE CLAIMS:

Amend claims 23 and 24:

23.(amended) A method for data management of a motor vehicle navigation system, comprising:
calculating driving routes in a navigation computer;
receiving a driving start position, and final destination position through a data input unit,
which is connected to the navigation computer;
transmitting to the user the driving routes calculated by the navigation computer;
storing in a first memory unit connected to the navigation computer, a basic database that
includes digital road map information, which is needed to calculate the driving route;
